

## ***Our Approach***

In a world which constantly presents organisations of all types, whether government, commercial or non-profit with security related threats and risks; these same organisations are always seeking to mitigate risk and protect their assets. Equally, the recognition of threats and rational decision making about allocating risk management resources, can often offer organisations competitive advantages.

At Anubis we understand these issues and concerns and recognise the growing demand for qualified security risk management professionals. To address this requirement, Anubis developed and has further refined its ground breaking course specifically aimed at the role of the security consultant.

## ***The Course***

The Certified Security Consultant (CSC) course has been running successfully for over two years. The fact that the course is accredited by Buckinghamshire New University, Skills for Security and the Institute of Risk Management (IRM) illustrates the advanced level of this professional award. CSC can be considered as either a stand-alone qualification, or as part of an individual's Continuing Professional Development (CPD). On successful completion of the programme, graduates will receive the Level 5 Award and be entitled to place CSC after their names.

The course is primarily aimed at candidates who seek to gain employment as security consultants, or at a management level within the security industry. The three modules are structured to provide an individual with a broad understanding of security consultancy services and the core knowledge and skills to enable them to effectively manage a range of security functions.

## ***Certified Security Consultant (CSC) Course***

Roles & Responsibilities Organising the Security Function Corporate Governance Criminology & Crime Prevention Physical Security Emergency Planning Business Continuity Management Project Management Emergency Evacuation Planning Emergency Response Procedures Journey Management Continuing Professional Development  Module 3 Project

### ***Why this course?***

This course has been developed to ensure that students are equipped with a sound understanding of the principles of security risk management. The programme has been designed in such a manner, that a student commencing the course with little or no understanding of security risk management is able to deal with a wide range of security related issues on successful completion of the three modules. To ensure its relevance the course has been written and is delivered by individuals with a depth of experience, delivering security consultancy services to numerous corporate clients, from a wide variety of sectors across the world.

### ***Who should attend?***

*Anyone who wishes to become a professional security consultant.*

*Anyone with a managerial role involving responsibility for security consultancy, or the management of security.*

*Anyone involved in assessing security related threats and risks, or wishing to become involved in this type of work.*

*Anyone who is seeking to gain employment as a security consultant or at management level in the security industry, or perhaps have already embarked down this route, this course will enhance and further equip you with the core skills and knowledge required by the role.*
